**TO: Ministry of Transportation and Infrastructure, Province of British Columbia**  
**RE: BikeBC Funding Application – City of White Rock**

The HUB Cycling Surrey White Rock Committee supports the application from the City of White Rock for funding to assist with completing marking and signage to complete all shared road bike routes shown in city's Strategic Plan.

By providing share the road markings "sharrows", safety signs and wayfinding signs to mark new bike routes on existing city streets the City of White Rock will be nearly doubling the size of the current cycling network. Designating official bike routes, providing markings and signs will provide residents and visitors with many more options to use bikes to visit and cycle different areas of the city. The sharrow markings and warning signs will provide increased safety by letting drivers know that these streets are official bike routes and that they should expect cyclists on them and letting cyclists know where they should position themselves in the street.

We hope that you will support City of White Rock's funding application for completion of this important project.

Sincerely,

Tim Yzerman  
Chair, Surrey White Rock Committee  
HUB Cycling
