Subject: Alex Fraser Bridge: Cycling Improvements

Further to our meeting on September 28 of this year, we are pleased to inform you that MOTI and the design team have reviewed the various suggestions for improvements and have tentatively approved 20 different improvements for the cycling infrastructure around the Alex Fraser Bridge as part of the Capacity Improvement project. Improvements include local sidewalk widening on the bridge, signage upgrades, and path widening/repaving at various locations. Attached is a draft presentation to briefly overview each improvement.

Note that in the interest of time we have initiated the field survey and detailed design for these improvements, to occur concurrent with your review and we respectfully request a written response no later than January 12 to ensure we have sufficient opportunity to meet and to make changes as required.

These cycling improvements are planned to be included as part of the next phase of the Alex Fraser Bridge Capacity Improvement project, with a tender date in late February 2018.

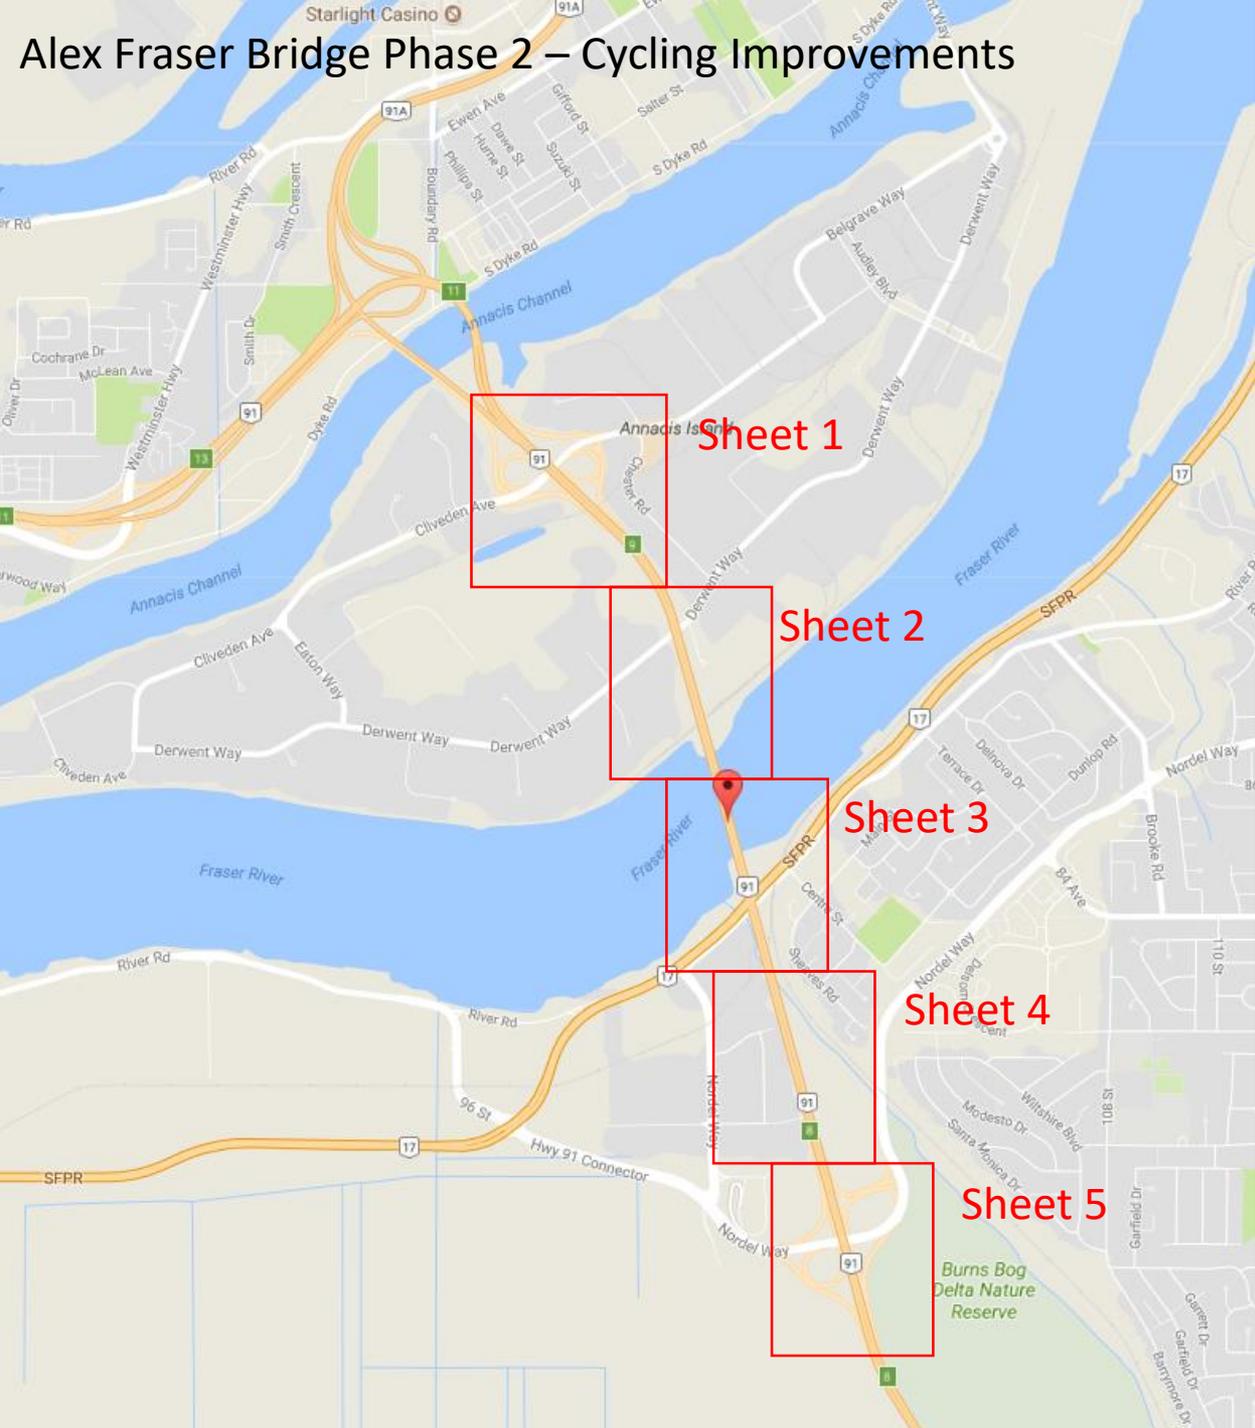

Respectfully,

Gerry Fleming
Project Manager for the Alex Fraser Bridge Capacity Improvements Project

Cc: Dave Mintak, Regional Manager, Project Delivery
Ashok Bhatti, Regional Director, South Coast Region
