Kevin, Matt, Rex and Shezana,

Thank you again for joining us on a ride to see cycling infrastructure in Maple Ridge and Pitt Meadows and the many connections with TransLink's mandate. We really appreciated your interest and engagement.

Attached is a summary including recommendations related to how TransLink can improve cycling conditions in the region. We look forward to hearing back from you on what actions TransLink can take. In return, please continue to let us know how we can support you in our shared goal to get more people cycling more often.

As mentioned, it would be great to coordinate a similar ride in the spring in another regional centre (Delta was mentioned) and invite local mayors, who are involved in significant funding and policy decisions for TransLink, as well as in their local municipalities. Sorry to miss you on this ride, Shezana, but we'd love to see you on the next one!

Erin
