**3. Skytrain** - Tim talked about the presentation and questions. The project team told HUB that there now will be protected facilities as part of the project along the corridor and on routes around the stations. There will be secure facilities at most stations, likely bike parkades. HUB suggested storage for personal items so you would not have to take everything with you like wet gear. Team mentioned that they are also considering other forms of mobility like scooters. HUB got the opportunity to ask a number of questions and Tim read through the questions and responses.

Robert attended the meeting with Tim.
