Hi Tony,

We have taken another look at any final modifications to the design that could be accommodated here, and I can provide you with the following update in relation to the 2 highlighted points in your letter:

2. Sutherland crossing – We have now separated the cyclists and pedestrians for the crossing at Sutherland, with elephant feet highlighting the cyclist portion of the crossing. The response regarding the green paint is unchanged. The revised configuration will look like the screenshot below.

6. North intersection @ Hwy 1 WB on-ramp – As stated in the previous response, the project is provisioning for future signalization here, and is to be monitored by the District going forward.

With regards to the bylaw request, this is a separate issue for you to address with the District or City, and is not something that can be addressed by the Project unfortunately.

Thank you for your input. Have a great weekend.

Thanks,

Cormac

Hi Tony,

Thanks for the letter. I'll discuss this with CNV and DNV and get back to you.

Thanks,

Cormac
