

## Possible Traffic Calming Measures that would be Safe for Cyclists

1. Advisory bike lanes – one counterflow traffic lane with dashed bike lanes on either side which motorists can use to pass oncoming automobiles when there are no cyclist in the bike lanes.
2. Speed bumps (with a wide enough slit for cyclists to pass through?) or gently sloped pillows.
3. Curb bulb-outs with a pass-through for cyclists.
4. Speed Tables (raised crosswalks).
5. Traffic circles
6. Remove parking all along one side of the road to make room for marked bike lanes on each side of narrowed traffic lanes.
7. In mid-block sections, paint a narrow 1.5m wide green-painted shared lanes (with white sharrows embedded) in the middle of the narrowed traffic lanes on either side of the mountable centre islands or other middle of the road structures and install "SHARE THE ROAD - SINGLE FILE" signs in both directions.
8. Place green-boxed sharrows with "SHARE THE ROAD - SINGLE FILE" signs at strategic locations all along the bike route section to be traffic calmed by narrowed traffic lanes. If there are mountable centre islands or other middle of the road structures, pay particular attention to placing some just before entering the lane areas that are being narrowed.
9. Instead of two traffic lanes separated by a short length of the mountable centre islands, make it a short section of one counter-flow automobile traffic lane with separated bike lanes on either side.
