8. Holdom Overpass (At Douglas)
 - control lights at crossings?
 - raised crossings in the slip lanes?
 - the norland westbound got a new third lane which squeezes the eastbound lane forcing cyclists and trucks to share the lane. Only 2 lanes are needed
 - really hard for Holdom cyclists to continue straight NB and SB
 - NB Douglas doesn't need 2 lanes it only has one. If there's room for 2 through-lanes, then there's room for a bike lane.

Opportunity for temporary bike lane on Bainbridge between Broadway and Greenwood or Winston Street, has the City considered this.
